glove mould

# MEET ECLIPSE

The new sterile 400mm nitrile, hand-specific Eclipse, made on our specialty glove moulds, is the only answer to the question: **how do I stop my cleanroom gloves from rolling down?**

A problem plaguing operators and auditors for decades, solving the problem of skin exposure inside has always been a priority. This problem is now solved with our **Arm-Lock technology**, which lies at the heart of the Eclipse design. By using the highest quality material, we can ensure that our super clean and super smooth nitrile gives the user the best possible experience while keeping your Cleanrooms safe.

EXPOSED SKIN

GLOVE ROLL DOWN

# Smooth

enough for double donning  
but also...

.....Textured,  
for a better grip

# AS CLEAN AS THEY COME

<b>ISO</b> Class 4 & 5, GMP Grade A Compatible	<b>Chemo</b> Tested	<b>PPE Cat III</b> Certified
<b>Low</b> Endotoxin	Validated <b>Sterile</b>	

Less than 900 LPC at 0.5 Micron

# and as for THE PRICE.....

It's simple – at Isofield, we don't believe that extra length contamination control should cost you extra. Talk to your trusted distributor about making the switch from 300mm to 400mm today.
